

Sir/Madam:

Having the opportunity to travel throughout the United States in the military as well as my civilian job, I want to tell you what a valuable service having XM radio and it's local and regional traffic and weather services are for me. This service is extremely valuable and has significantly prevented delays and allowed me to fullfil my missions without delays. Whether traffic information or weather information, planning for trips has been much better since this service has been installed. Think about a trip to Washington, D.C...where can I get the weather and traffic when not in this region and in a vehicle...only one place....XM Radio.

Please keep the lobbyest away from this valuable service. The ariways are free, let's keep them that way.

Very Respectfully, Shawn K. Ward
